

Forest Road 300 Trip Report

DATE: 8/20/19

The forest gave us some hard work to do, trying to ID lots of young birds in trees with lots of leaves. The birds were also quiet just to make it harder. We were lucky to have a few birders with great cameras, so that did help a lot. The weather was with us that day, Sunny with no wind. We did get some great birds and lifers for a lot of the birders.

Birders: Kathy Barrowclough, Paul Doucette, Fran Boughman, Milford and Elie Suida, Jean Eddins, Elaine Alexander and Donna Smith.

Birds: Turkey Vulture, Common Raven, Pine Siskin, Morning Dove, Acorn Woodpecker, Mountain Chickadee, White-breasted Nuthatch, Scrub Jay, Dark-eyed Junco, Black-throated Green Warbler, Red-faced Warbler, Wilson's Warbler, Hutton's Vireo, American Robin, Northern Flicker.
